[william.r.saunders@nasa.gov](mailto:william.r.saunders@nasa.gov)

Hi everyone,

I cc my colleague Dick French to this email, as he made an updated prediction for MIRA.  
Rick, are you still planning on using MIRA?

Dick and I had a campaign last November in India, the event was observed with two IR  
telescopes, which allows to refine the orbital prediction for this April event.

I am attaching here the timings for the rings and atmosphere contact, if someone else is  
planning to attempt the event with a good methane filter please let us know.

The April campaign is directed by my colleague Will Saunders who is also cc'ed into this  
email.

For questions about this event, you can email Dick, Will, and I.

Cheers,

Damya Souami, [damya.souami@obspm.fr](mailto:damya.souami@obspm.fr)
