

OENONE SITE ASSIGNMENT LIST last updated 10/9 at 552pm CDT

Caveat: there is nothing magic about the assignments. They are listed based on convenience in placement for multiple sites, local observers and fixed observers. All mobile observers in Las Vegas are being assigned based on need. As usual the path is as reliable as can be imagined. There always exists the possibility that the path could shift in either direction or even completely out of the zone.

Prediction zone is between 20N and 20S with error bars extending to 46N and 46S.

SITE	#	OFFSET FROM CENTER	HIGHWAY	OBSERVER	SCOPE	FIXED?	
A	1	64N	93N	R.VENABLE 1	50MM/VTI
